

## ScentPalette™ Scent Machine

Computer controlled (USB) 8 cartridge scent machine that uses compressed air to project different scents on cue for a predetermined time ... followed by a burst of unscented air to clear for the next scent. Software can time scents to fit digital media, etc. Scent when dispersed covers approximately 10' to 20' in front of unit, depending on how many fans are used.

**4 fans, 120V**

**Controls:** Computer software determines scent chambers used, timed release of scents and timed release of compressed air.

**Power Cord:** Black, 6', 3-conductor, SJT type

**Construction:** Steel

**Specifications: Shipping Weight 12 lbs.**

**Product Dimensions: 16½" L x 10" W x 5½" H**

**Does not include compressed air tank or mechanism**
