

## ScentVent™ Scent Machine

This unique 3-speed-pivoting-fan Scent Machine has 5 times more output on its lowest setting than the WhisperScent (formally the ES1) and is 10 times stronger on its highest setting. The ScentVent is not as quiet as the WhisperScent, but remarkably quiet never the less. Scent Cartridges are placed at air intake. The cartridges are heated just like the WhisperScent, so the scent can be drawn effectively through the machine.

### Motor 3-speed, 1/16 HP, 120V

(Ball bearing, permanently lubricated, permanent split capacitor)

Controls: Side mounted rotary dial switch
