

WhisperScent™ Scent Machine

The WhisperScent™ machine uses a high-end computer fan that is very quiet. It is designed to handle any room size from 100 SqFt to 5,000 SqFt plus. This is accomplished by the use of two controls on the machine. Both control settings are infinitely variable, versus a "low-medium-high" type setting. One setting controls the fan and the other the amount of scent. One push button turns the machine on or off.

120V

Controls: Top mounted rotary dial switch
Power Cord: Black, 6', 3-conductor, SJT type
Construction: Steel
Compliances: CSA

Specifications: Shipping Weight 8 lbs.
